Highlights

Carbon footprint

Energy savers reduce the amount of energy in your home, which results not only in a lower energy bill, but also in less carbon (CO2) output by your energy supplier. Together we make this a better world to live in.

Energy efficient

All Philips energy savers save energy from the moment you turn the switch. During their lifetime they use fewer kW and thus also result in a lower energy bill. The level of energy saving differs per lamp type and technology.

Instant start

Immediate light when switched on: that is the promise of our instant starting energy-saving lamps.

No hazardous substances

LED lamps contain absolutely no hazardous materials, making them safe for any room and convenient to recycle.

Coloured accent lighting

To highlight a certain area in or around your home, Philips offers a range of coloured and LED lamps.
